

**Wie wollen
wir leben?**

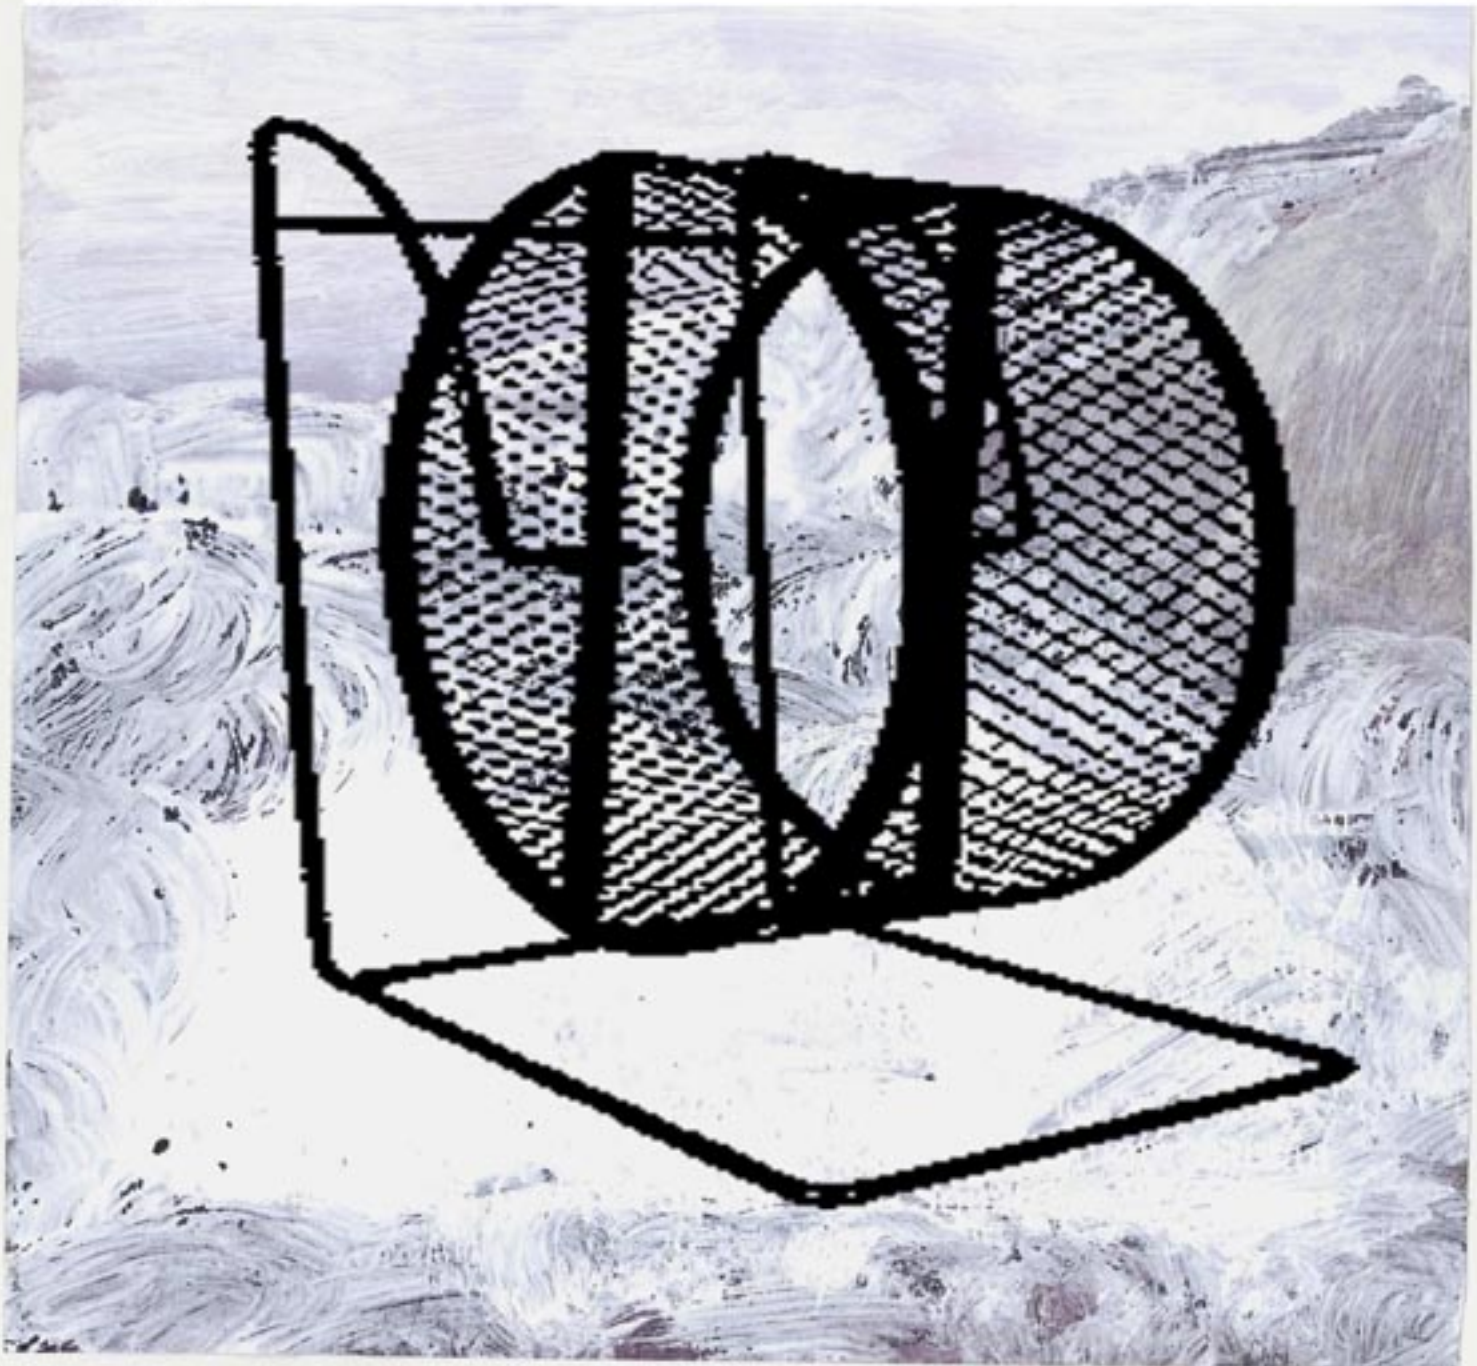

“Wie wollen wir leben”

is the name for the project, which Christine Geesing has developed for her presentation at SMAF 2013. As a member of the multi-national T.act-Group who have developed the wiki-platform “topologyof staggered routes” which they present at this event. This platform was installed in order to build up a sustainable and for all participating artists reliable platform that shall serve “getting linked with each other” and with it “getting in touch, getting to know more about each other, getting a feeling of the various lives that artists live all over the world.”

“Wie wollen wir leben” means “How do we want to live” and with this topic and the presented serie Christine Geesing touches past and future, fear and hope, dream and reality of her own environment. Fragments - of course. But to be seen as a diary of the beginning of thoughts she has contributed to the platform.
